## Fiberglass PP Honeycomb Sandwich Panels

### Description:

Fiberglass PP honeycomb sandwich panels, manufactured by Composite Box, feature high-strength FRP skins and a lightweight polypropylene honeycomb core, bonded with PU adhesive using vacuum and high-pressure lamination. This ensures crack resistance and flatness. Customizable from 10 to 80 mm thick, up to 12 meters long, and 2.75 meters wide, they offer anti-scratch, impact-resistant, waterproof, and corrosion-resistant properties. Ideal for construction, dry truck bodies, and partition walls, they provide superior pressure resistance and stability.

### Features:

- Lightweight PP honeycomb core
- High-strength FRP skins
- Customizable thickness, sizes
- Waterproof, corrosion-resistant
- Strong pressure resistance

### Advantages:

- High strength-to-weight ratio
- Easy to process, install
- Resistant to deformation, impact
- Environmentally friendly, durable
- Ideal for construction, transport

### Common Parameters

 Customer Satisfaction	 Quality Assurance	 Advanced Production Line	 Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
