Fiberglass XPS Foam Sandwich Panels

Description:

Fiberglass XPS sandwich panels feature gel-coated FRP skins bonded to a waterproof XPS foam core, delivering exceptional thermal insulation and durability for up to 50 years. Manufactured using a high-pressure curing process, these panels offer UV resistance, high strength, and rigidity, making them a superior alternative to traditional composites. Customizable CNC machining, embedded reinforcements, and enhanced UV protection are available. Ideal for applications requiring lightweight, corrosion-resistant materials, they ensure excellent thermal performance and ease of installation.

Features:

- Lightweight, high-strength material
- UV, corrosion, and moisture resistant
- Customizable dimensions and core density
- Superior thermal insulation
- Long-lasting, up to 50 years

Advantages:

- Easy to install and process
- Excellent waterproofing (99% closed-cell)
- Enhanced UV and corrosion resistance
- Ideal for refrigeration and insulation
- Reliable, high-quality customization

Common Parameters

			
Customer Satisfaction	Quality Assurance	Advanced Production Line	Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
