## Stainless/Galvanized Steel Foam Sandwich Panels

### Description:

Stainless/Galvanized Steel Foam Sandwich Panels, manufactured by Composite Box, feature high-strength stainless (202/304/316) or galvanized steel skins bonded to rigid foam cores (PU, XPS, PET, PVC) using polyester adhesive. These panels offer superior impact resistance, corrosion resistance, and thermal insulation, with a service life exceeding 30 years. Customizable in size (up to 12m long, 2440 mm wide, 8 – 120 mm thick), surface finish (polished, brushed, PVD-coated), and foam type, they are ideal for building facades, refrigerated trucks, and sanitary environments.

### Features:

- Stainless/galvanized steel skins
- Customizable foam cores
- Corrosion, impact-resistant
- Fireproof, thermally insulating
- Wide temperature range (-30 ° C to 40 ° C)

### Advantages:

- Long-lasting, durable design
- Easy to clean, maintain
- High strength, non-deforming
- Aesthetic, customizable finishes
- Ideal for sanitary, high-strength uses

### Common Parameters

 Customer Satisfaction	 Quality Assurance	 Advanced Production Line	 Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
