Insulated Truck Body Panels

Description:

Composite Box manufactures high-performance insulated truck panels using fiberglass skins and XPS/PU foam cores for superior thermal efficiency. Lightweight, durable, and customizable in size (up to 11.8m) and finish, they are ideal for refrigerated transport. Features include easy CKD/SKD assembly, corrosion resistance, and energy-saving design. Perfect for food, pharma, and logistics industries. 🚚❄️

Features:

Premium insulated truck panels feature fiberglass skins (0.8 – 5mm) + XPS/PU foam core, customizable up to 11.8m length. Lightweight, durable, with glossy/matte/non-slip finishes. Includes latches, hinges & LED lights. 5-axis CNC precision, CKD/SKD kits. Ideal for refrigerated transport in food/pharma industries.

Advantages:

High-performance insulated panels with XPS/PU foam cores ensure superior thermal efficiency for cold chain logistics. Lightweight yet durable construction reduces vehicle load while resisting corrosion. Fully customizable sizes and textures available. Modular CKD/SKD kits enable easy assembly. Complies with global standards, offering cost-effective operation with low maintenance. Manufactured using advanced 5-axis CNC and hot-press technology. Ideal for food, pharmaceutical and emergency transport applications.

Common Parameters

 Customer Satisfaction	 Quality Assurance	 Advanced Production Line	 Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
