## Plywood Foam Panels

### Description:

Plywood foam composite panels, made of fiberglass, aluminum, rigid foam, and marine-grade plywood, offer ultra-high strength, waterproofing, insulation, and aesthetics. With 20~150mm thickness and customizable core and plywood options, they suit 30+ harsh environment applications like construction, furniture, and RVs.

### Features:

- High-Strength Structure: Fiberglass and aluminum enhance bending resistance.
- Lightweight Customization: 0.7~5mm fiberglass skin, 20~150mm thickness.
- Waterproof Insulation: Foam core ensures excellent thermal and moisture resistance.
- Multi-Material Core: Supports PET, PVC, PU foam, XPS, and PP honeycomb.

### Advantages:

- Superior Durability: Over 20-year lifespan, scratch- and age-resistant.
- Low Maintenance: Reduces costs and frequency of upkeep.
- Deformation-Resistant: Three-layer composite ensures stability.

### Common Parameters

 Customer Satisfaction	 Quality Assurance	 Advanced Production Line	 Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
