PP Honeycomb Vinyl Flooring Panels

Description:

PP Honeycomb Vinyl Flooring is a lightweight composite material combining a vinyl wood-grain surface with a PP honeycomb core. Manufactured using high-pressure composite technology, it offers over 20 wood-grain styles. Ideal for RVs, yachts, mobile homes, warehouses, offices, and box trucks, it provides customizable widths, lengths, and thicknesses up to 3200 mm wide and 11800 mm long. This flooring enhances strength, reduces costs, and ensures durability for various indoor and transportation applications.

Features:

- Customizable Dimensions: Available in thicknesses of 8 – 40 mm, widths up to 3200 mm, and lengths up to 11800 mm.
- Variety of Styles: Over 20 vinyl wood-grain patterns for aesthetic versatility.
- High-Pressure Composite: Made with PP honeycomb cores weighing less than 80 kg/m³.
- Application Versatility: Suitable for RVs, yachts, trucks, warehouses, and offices.
- Tailored Solutions: Fully customizable production to meet specific application needs.

Advantages:

- Lightweight: Hollow PP honeycomb core reduces weight, boosting transport efficiency.
- Deformation Resistance: Superior pressure absorption prevents bending or warping.
- Long Service Life: Corrosion-resistant vinyl and durable core ensure longevity.
- Cost-Effective: Low material and maintenance costs with easy cleaning.

Common Parameters

			
Customer Satisfaction	Quality Assurance	Advanced Production Line	Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
