12 Foot Refrigerated Box Truck

Description:

The Composite Box 12ft Refrigerated Truck is built with fiberglass composite materials, offering customizable height and width. Designed for efficient cold chain transport, it ensures cargo freshness with superior insulation. Ideal for urban delivery and short-haul logistics, it supports food, flowers, and fresh produce. Compatible with straight trucks, trailers, and semi-trailers, it provides versatile 12-foot refrigerated solutions.

Features:

30% lighter than aluminum trucks, it boosts fuel efficiency. High-density PU/XPS foam ensures excellent insulation. Seamless interior lining enhances hygiene. With strong corrosion and UV resistance, it offers a 20+ year lifespan. Modular design allows quick assembly, reducing setup time.

Advantages:

Constructed with fiberglass composites and XPS/PU foam core for lightweight insulation. Compatible with various refrigeration units (-18 ° C to 7 ° C). Aluminum alloy frame and reinforced steel ensure stability. Seamless interior meets food safety standards, ideal for transporting fresh produce.

Common Parameters

 Customer Satisfaction	 Quality Assurance	 Advanced Production Line	 Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
