## Fiberglass Plywood Panels For Truck

### Description:

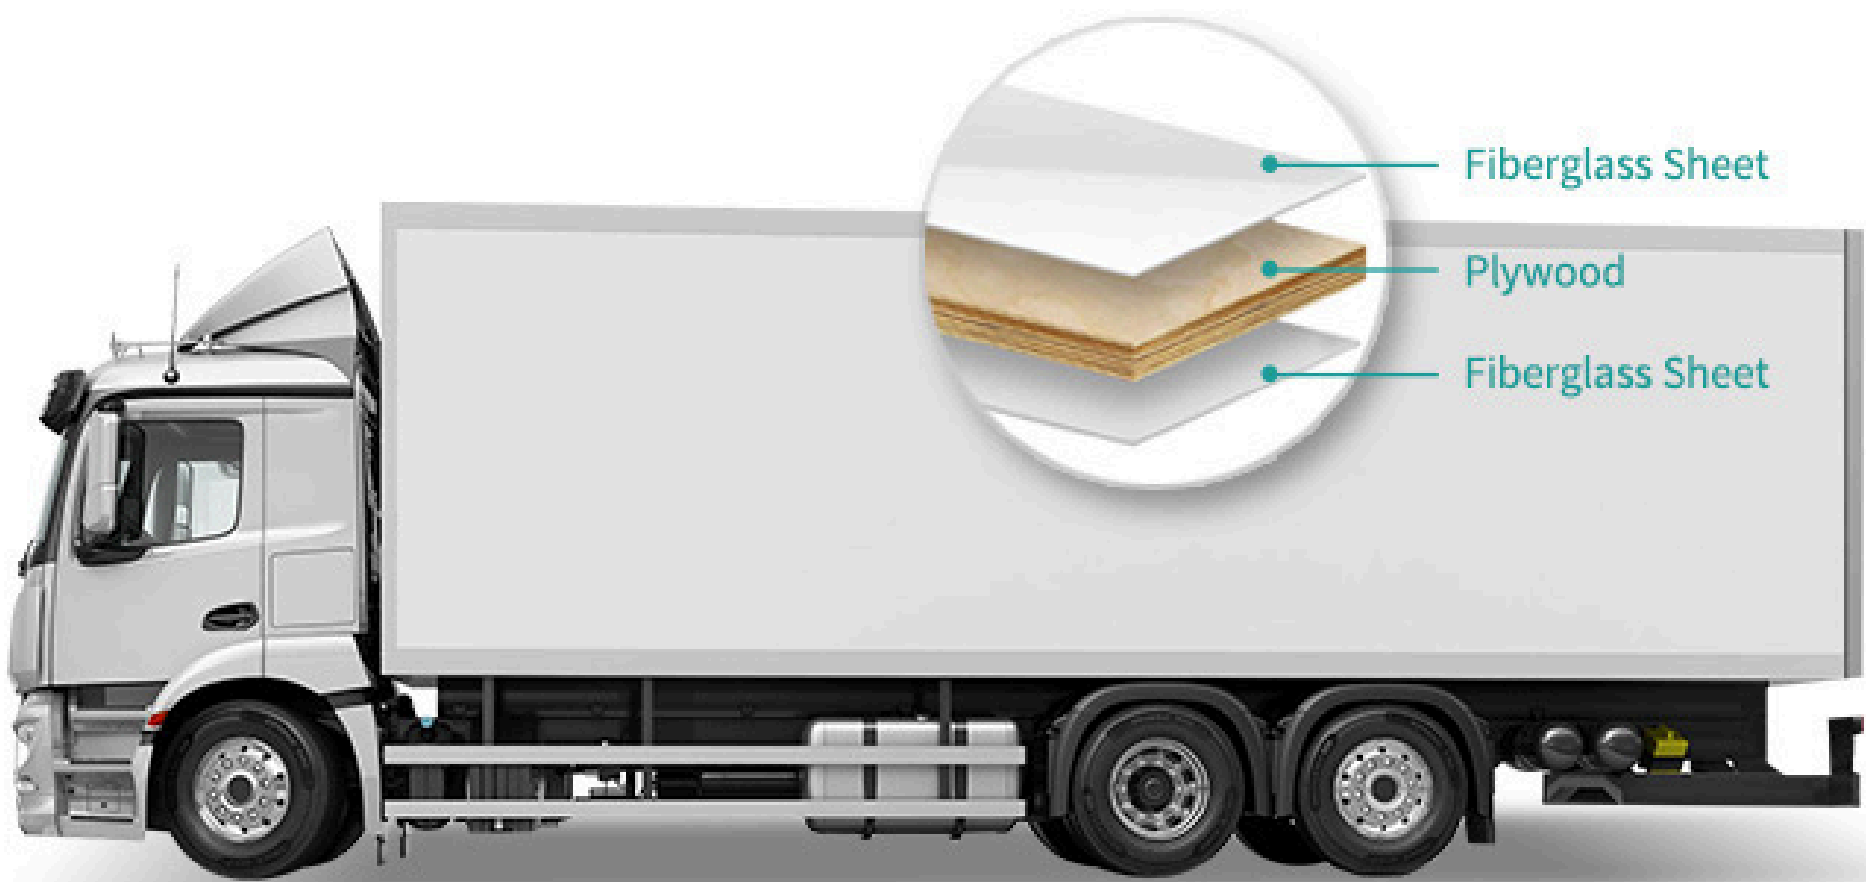

Our fiberglass plywood panels are designed for truck bodies, combining 1.5mm fiberglass with marine-grade plywood for superior strength. Cross-laminated wood layers, dried naturally for 8+ years, prevent warping. Ideal for floors, walls, and roofs, they offer waterproofing, corrosion resistance, and lightweight durability. Vacuum-pressed for reliability, they outperform traditional plywood in freight and logistics applications.

### Features:

- Weatherproof for harsh climates
- High-strength, impact-resistant construction
- Lightweight for better fuel efficiency
- Fire-resistant fiberglass layer
- Low-maintenance glossy surface
- Modular CKD/SKD assembly
- 10 – 40mm thickness options
- 15+ year lifespan

### Advantages:

- Cost-effective vs. metal alternatives
- Rustproof for humid environments
- Faster installation saves labor
- Eco-friendly materials
- Compatible with cargo systems
- Enhances vehicle appearance
- Strong load-bearing capacity
- Meets global transport standards

### Common Parameters

			
Customer Satisfaction	Quality Assurance	Advanced Production Line	Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
