## Box Truck Body 12FT

### Description:

Composite Box 12 ft box truck bodies are lightweight fiberglass composite dry freight solutions for urban delivery and local logistics. Featuring 15mm+ fiberglass core panels with 2mm outer skin, rivet-free quick-install design, and sturdy steel framing. Heat-resistant, corrosion-proof, impact-resistant, and insulated for energy efficiency. Compatible with most chassis, supports CKD/SKD delivery, liftgates, and accessories—superior to aluminum bodies in durability and performance.

### Features:

- Fiberglass composite panels with 15mm+ core thickness.
- 2mm durable outer FRP skin for protection.
- Rivet-free, quick-install integrated structure.
- Heat-resistant, corrosion-resistant, and impact-proof design.
- Lightweight with excellent thermal insulation properties.

### Advantages:

- Significantly lighter than aluminum bodies, reducing load and improving fuel efficiency on urban routes.
- Offers superior impact and scratch resistance, ensuring long-term durability with minimal maintenance.
- Provides effective thermal insulation, suitable for temperature-sensitive cargo in varying climates.
- Enables fast CKD/SKD assembly and high chassis compatibility for efficient customization and deployment.

### Common Parameters

			
Customer Satisfaction	Quality Assurance	Advanced Production Line	Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
