Rear 3-Door Composite Truck Body

Description:

Composite Box rear 3-door composite truck bodies feature high-strength fiberglass foam sandwich panels (or aluminum alloy options) with multi-layer insulated construction. The innovative triple full-opening rear doors maximize access in tight spaces, ideal for dry cargo or refrigerated trucks. Lengths 3 – 12 meters, supports multi-temperature zones, CKD/SKD delivery, and over 20 kit configurations—perfect for efficient food, produce, and general cargo transport with durable, easy-operation design.

Features:

- Triple full-opening rear doors for maximum cargo access.
- Fiberglass foam or aluminum composite panel construction.
- Rigid insulating foam core for thermal performance.
- Corrosion-resistant and lightweight multi-layer structure.
- Supports multi-temperature zone customization.

Advantages:

- Provides exceptional accessibility in confined loading areas with three full-opening doors, simplifying operations and reducing time compared to standard single or double doors.
- Achieves superior thermal insulation and versatility through foam-filled panels and multi-zone capability, ensuring safe transport of temperature-sensitive food, produce, or mixed cargo.
- Delivers long-term durability and low maintenance with high-strength, corrosion-resistant materials designed for frequent use and a robust service life.
- Offers complete customization in length, materials, door configurations, and CKD/SKD kits, enabling truck manufacturers and converters to meet diverse market needs efficiently.

Common Parameters

			
Customer Satisfaction	Quality Assurance	Advanced Production Line	Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
