## Side Roll-Up Door

### Description:

Composite Box side roll-up doors provide efficient vertical operation for box trucks, refrigerated trucks, and dry cargo vehicles. Built with aluminum alloy frames and PU/PET foam-insulated composite slats, they ensure superior sealing, thermal insulation, and weather resistance. Available in manual or electric versions with heights from 1 – 2.6 meters. Full customization, complete 13-piece accessory kit, and CKD/SKD delivery make them ideal for urban delivery and short-haul logistics.

### Features:

- Aluminum alloy frame with PU or PET foam slats.
- Vertical roll-up mechanism for space-efficient one-handed operation.
- High-performance weatherstrip and seal for excellent insulation.
- Manual or electric motor drive with remote options.
- Comprehensive 13-component accessory package included.

### Advantages:

- Maximizes loading/unloading speed in tight urban areas with vertical opening that requires zero outward clearance, enhancing daily operational efficiency.
- Maintains stable cargo temperatures through strong insulation and tight sealing, perfectly suited for refrigerated or temperature-sensitive short-haul transport.
- Offers long-term reliability and minimal maintenance with corrosion-resistant materials, sturdy components, and simple part replacement for heavy-duty use.
- Delivers maximum versatility via customizable heights, drive systems, insulation levels, and full accessory sets plus CKD/SKD options for any truck or logistics need.

### Common Parameters

			
<b>Customer Satisfaction</b> Insisting on high quality products and servers, centered around customer experience	<b>Quality Assurance</b> We strictly control every production process to bring reliable quality assurance to our customers	<b>Advanced Production Line</b> The world's top production line ensures product precision and efficiency	<b>Customization</b> We provide 100% customization, making orders less difficult
