Sliding Side Door Box Truck Body

Description:

Composite Box sliding side door box truck bodies feature modular FRP sandwich panels with high-strength fiberglass skins and XPS/PET foam cores for lightweight construction and superior thermal insulation. The innovative sliding side door system enables fast, space-saving access for efficient loading/unloading. Delivered in CKD/SKD kits, these bodies support full customization of dimensions, panel thickness, and configurations—ideal for urban logistics, cold chain, and specialized transport.

Features:

- High-strength FRP outer and inner sandwich panel skins.
- XPS or eco-friendly PET foam insulation core.
- Smooth-running sliding side door with wide opening access.
- Modular CKD/SKD kit for rapid 2-hour assembly.
- Corrosion-resistant, durable, and weatherproof composite structure.

Advantages:

- Cuts loading/unloading time by over 50% with full-side access sliding doors, enabling simultaneous forklift use and improving operational efficiency dramatically.
- Maximizes payload capacity and reduces fuel costs through lightweight composite design while delivering excellent thermal insulation for temperature-sensitive cargo.
- Ensures long service life with FRP's superior corrosion resistance, water repellency, and aging protection, minimizing maintenance and replacement expenses significantly.
- Provides extensive customization of size, insulation thickness, door placement, and accessories, perfectly adapting to urban distribution, cold chain, mobile retail, or retrofitting needs.

Common Parameters

 Customer Satisfaction	 Quality Assurance	 Advanced Production Line	 Customization
Insisting on high quality products and servers, centered around customer experience	We strictly control every production process to bring reliable quality assurance to our customers	The world’ s top production line ensures product precision and efficiency	We provide 100% customization, making orders less difficult
