Thermal Partition Wall For Truck

Description:

Composite Box thermal partition walls for trucks feature fiberglass or CFRT skins with PU, XPS, EPS, or mineral wool cores (5 – 10 cm thick). These lightweight, removable insulated bulkheads create multi-temperature zones in refrigerated trucks, delivering superior sealing, high R-value insulation, and energy efficiency. Easy snap-fit installation, durable anti-aging performance, and customizable materials/colors make them ideal for food, pharmaceutical, produce, and dairy transport with 10+ year lifespan.

Features:

- Fiberglass or CFRT outer skins for durability.
- High-performance PU/XPS/EPS foam core insulation.
- Thickness range 5 – 10 cm for flexibility.
- Snap-fit connectors for quick install/removal.
- Excellent sealing gaskets maintain thermal integrity.

Advantages:

- Enables efficient multi-temperature zone transport (ambient, refrigerated, frozen), expanding cargo versatility and increasing profitability for temperature-sensitive goods delivery.
- Reduces energy consumption significantly through high R-value insulation and superior sealing, lowering refrigeration unit runtime and operational costs over time.
- Provides lightweight, easy-to-handle design that minimizes vehicle load while offering long-term durability and consistent performance exceeding 10 years.
- Offers full customization in materials, thickness, colors, and configurations with simple installation, perfectly suiting diverse refrigerated truck and trailer applications.

Common Parameters

 <p>Customer Satisfaction</p> <p>Insisting on high quality products and services, centered around customer experience</p>	 <p>Quality Assurance</p> <p>We strictly control every production process to bring reliable quality assurance to our customers</p>	 <p>Advanced Production Line</p> <p>The world's top production line ensures product precision and efficiency</p>	 <p>Customization</p> <p>We provide 100% customization, making orders less difficult</p>
